

CONTROL

Control all Video Meetings in One Application

Benefits to Users:

- Video meetings start on-time every time
- Confidence
- Adoption

Benefits to Administrator:

- Fast and flexible search for instant assistance
- Less ad-hoc interruptions
- Video network insight
- Resource utilization overview

Synergy CONTROL is an application that gives administrators full control of all video meetings – whether they are ad-hoc or scheduled. Its unique search function provides an instant overview when immediate assistance is required, and the command functions let the administrator take action using a variety of command functions. In total, this ensures seamless video meetings and more efficient work-flows in the organization.

Synergy CONTROL is perfect for any type of organization and its clean and intuitive user interface allows anyone to learn its basic in no time.

KEY FEATURES

- ✓ Complete overview of ongoing and upcoming meetings, both scheduled and ad-hoc

- ✓ Jitter
- ✓ Bandwidth

SUPPORTED TECHNOLOGIES

- ✓ Cisco CMS (including clustered conferences)
- ✓ Cisco Smart Room
- ✓ Pexip Infinity

FEATURES

View all active meetings

Monitor both ad-hoc and scheduled on Pexip Infinity and Cisco CMS multi-conference units

View upcoming scheduled meetings

This feature is available with Synergy JOIN integration

Search for meetings

Find both scheduled and ad-hoc meetings with meeting name, participant name, email or meeting date

Create Custom Views or a list of “favorite” meetings

Executives require their meetings to run flawlessly. Create your prioritized custom views to always see what is important.

Add participants

Add participants to meeting by using URL, or by email invite* for scheduled meetings

Connect/disconnect and mute/unmute participants

By using simple command functions

View total number of participants attending the meeting

Works only if the end point has people-counter technology

Meeting locking

Close virtual meeting whenever needed

*requires Synergy JOIN

NEW Synergy Of Things

Synergy of Things optimizes resource utilization by better understanding scheduling behavior, booking patterns and meeting attendance.

Using Synergy JOIN, CONTROL and ANALYZE together, organizations can now harness the power of their calendaring system to optimize their meeting room facilities using endpoints and in-room sensors.

No-show detection

Informs the meeting organizer when a booked room is not being used. Administrators can implement rule-based logic to de-book unused rooms. Virtual meeting remain untouched.

Booking and utilization reports

Synergy of Things leverages endpoint and sensor information to deliver analytics on usage and resource utilization. Collecting data from booked versus actual usage, the Synergy of Things platform gives insight into virtual meeting technology trends, space utilization and visibility to possible meeting-based asset management improvements.

No-show pre-warning

The Synergy of Things technology can be used to send pre-warnings to administrators and/or a meeting organizer if there is no one in the room at meeting start time.

Control all video meetings – both scheduled and ad-hoc - in one application. Used together with Synergy JOIN, it forms a powerful tool for seamless meetings.
